Description

The BL880M1IR is an 8MP HD bullet camera with built-in IR illumination providing clear images under any lighting condition. With its cable-managed bracket, IP66 construction, IK10 vandal resistant housing and motorised lens, installation is fast and easy, and remote adjustment is simple.

Multistream high definition

The camera has quad-stream capability for simultaneous streaming of H.264/H.264 or H.264/MJPEG. Multiple combinations of resolution and frame rate can be configured to satisfy different live viewing and recording scenarios. 8 Mpixel resolution is available at 25/30 fps, a full-HD 1080p stream at 50/60 fps can be combined with a 720p stream at 50/60 fps. Each selected resolution-frame rate combination can be freely set to a stream number.

Open standards

Multiple options are available to easily integrate the BL880M1IR to a video management system. In support of open standards, the camera is compliant with the ONVIF Profile S specification.

Image optimisation

The BL880M1IR provides automatic day/night functionality with configurable thresholds and built-in IR illuminator, for use in low-light situations. Backlight compensation enhances image visibility in difficult lighting situations. The BL880M1IR provides wide dynamic range by using different gain ratios for different illuminated areas to bring details in the darker areas of an image without saturation in the brighter parts.

The available image optimisation methods ensure quality pictures at all times.

Power source choices

The BL880M1IR can be powered by 12 Vdc, 24 Vdc, 24 Vac, or over the network with 802.3at-compliant PoE sources.

Privacy masks

Privacy masks cover sections of the image. This feature is often requested for such situations as city centre surveillance and point of sale keypads.
